

JONATHAN MADILL

CNA

ABOUT AND MY GOALS

I was inspired by my mother to work in the medical field. Even though I knew the work was hard and the hours are crazy I couldn't imagine myself doing anything else. I learn to work for what I want through wrestling, school, and my mother. My goals are to get a higher education in the medical field, either a MD or PA

EDUCATION

- passed AP human geography and AP biology exams.
- Earned my CNA certification through Canyons technical institute in January of 2022
- currently taking a MA course
- CPR certified
- First aid education through SLCC

EXPERIENCE

2019

freshmarket

This was my first job that I started when I was 14. I rode my bike to work till I got a car and learned to make my own money. This job also allowed me to learn communication skills with customers and team members.

2022

Nursa

Working through a CNA agency called Nursa was my 2nd job after working at the grocery store for 2 years. this job allowed my to have a flexible schedule but still make good money. Also seeing different facilities and meeting different people helps me learn more about the medical field.

SKILLS

patients		first aid knowledge	
respect		CPR trained	
stress management		caring	

leadership

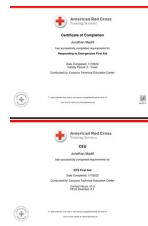

I learned leadership skills through wrestling. Being a captain of a wrestling team for about 3 years gave me a lot of experience. working with kids younger than me and all trying to get better at something. I learn to earn my teammates respect by treating them the same way I would want to be treated.

volunteer work

While taking my CNA class I was required to do 72 hours of clinicals. This is where I would go to a facility and work and learn from another CNA. I didn't get paid and the facilities were thankful for the extra help.

classes and certifications

I am taking IB biology and art which are very fun classes and benefit me greatly in my studies and career.

language

English was my first language but I grew up around Spanish speaking people. I am not fluent in Spanish but I know enough to communicate with residents if needed. This helps me a lot when I have residents that only speak Spanish.
